

Geranium instant report

Boris Solovyev, Nikita Platonov

2022-09-15 11:13:27

Instant report for ArcNet domain.

This is dynamically generated report based on passed parameters.

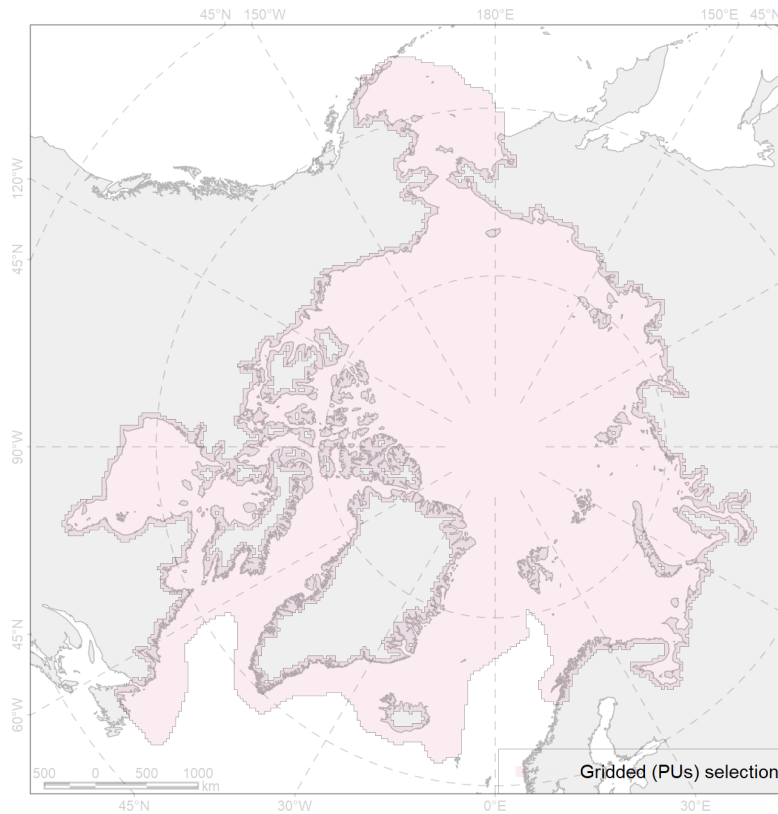

Figure 1: Selection

The area of selected region is 0 km². This selected area is inscribed into 22678 planning units (PUs). Selected area outside of PUs domain is ignored. Cellulated (gridded) selection is 20410200 km². For this gridded selection 16860980 km² are aquatories, and 3549220 km² are territories.

There are 514 conservation features (CFs) in selection. They represent “Walrus”, “Pinnipeds”, “Fishes”, “Cetaceans”, “Birds”, “Benthos”, “Coastal”, “Polar bears” groups of CFs. Industries represent “Aquaculture”, “Fishery”, “Infrastructure”, “Mining”, “Shipping”, “Tourism” activity groups.

Table 1: Principal concern indices

NAO	Conservation concern, not allowed only	3.789300e+04
NAC	Conservation concern, not allowed and conditional	2.526420e+05
NAOR	Conservation concern, not allowed only relative	1.670915e+00
NACR	Conservation concern, not allowed and conditional relative	1.114040e+01

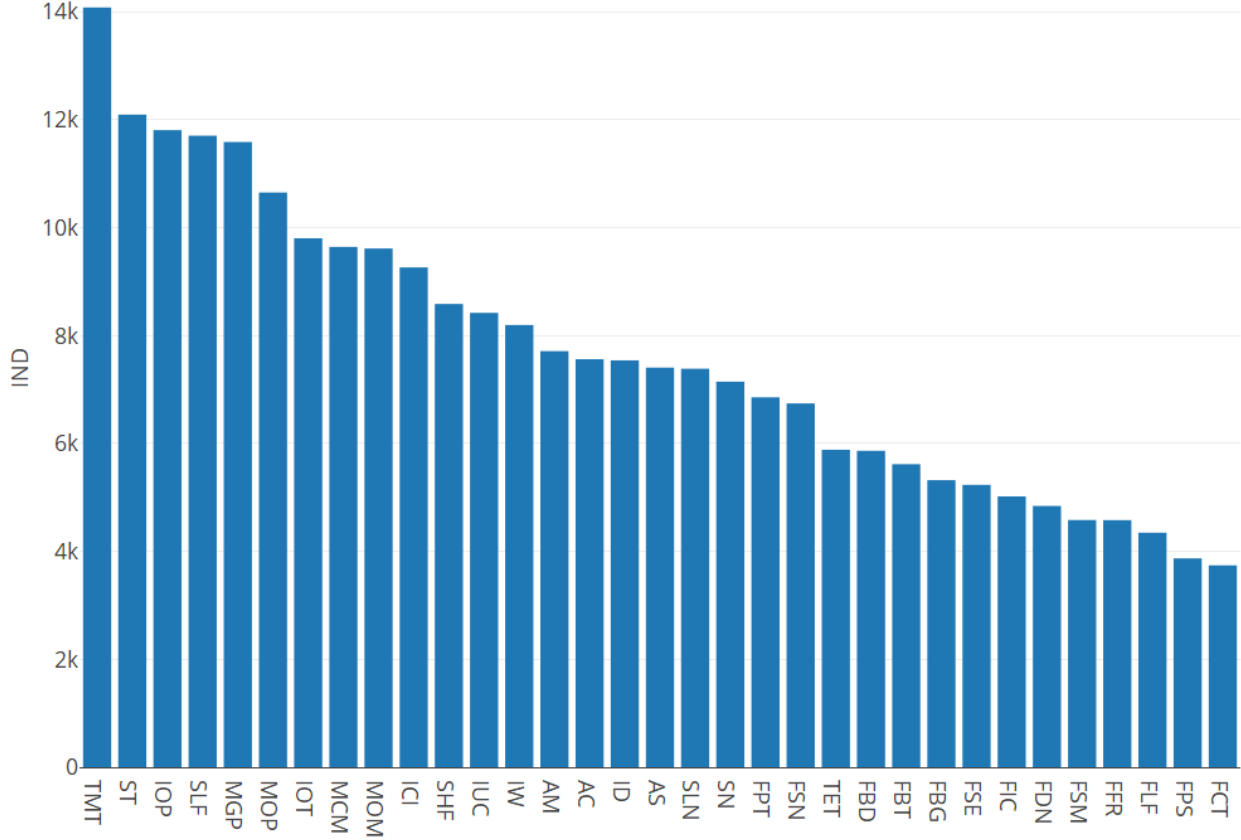

Figure 2: Industrial concern

Table 2: Industries of concern (TOP IND)

	Industry	Concern
IOP	Underwater oil&gas pipes	11805
ST	Tanker (oil and petrochemicals)	12092
TMT	Mass tourism	14078

Table 3: Industries of least concern (LC IND)

	Industry	Concern
FCT	Crab traps	3740
FLF	Longline fishing	4345
FPS	purse seiner	3870

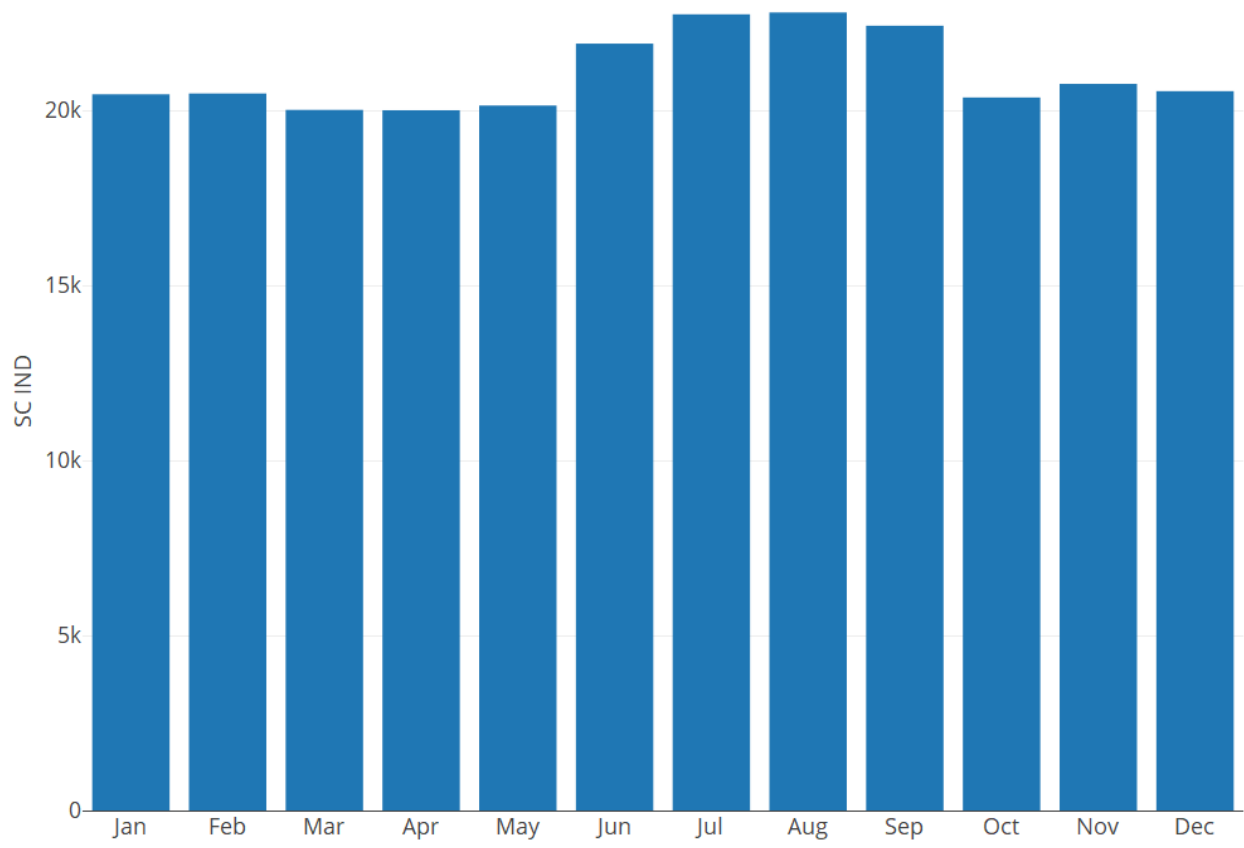

Figure 3: Seasonal concern

Table 4: Seasons of concern (SC)

	Concern
Jul	22744
Aug	22797
Sep	22418
